📍 Homagama, Sri Lanka

ABOUT ME

Software Engineering graduate with hands-on experience in full-stack web development through a Software Engineering internship at Sri Lanka Customs. Skilled in Python, Flask, PHP, JavaScript, React, Node.js, MySQL, and MongoDB, with experience building database-driven applications, employee management systems, bulk data processing features, and web-based business solutions. Strong interest in developing scalable, user-focused software and contributing to collaborative engineering teams.

EDUCATION

BSc (Hons) in Software Engineering | 2022-2026

ICBT Campus (Affiliated with Cardiff Metropolitan University, UK)

Second Class Upper Division

G.C.E. Advanced Level (Maths Stream) | 2017

Ke/Dehi/ Dehiowita National School

Maths Stream

WORK EXPERIENCE

Sri Lanka Customs Headquarters – Colombo | January 2026 – July 2026

Software Engineering Intern

Customs Employee Database Management System (DBMS)

- Developed a secure full-stack web application to centralize employee records and replace manual file-based record management.
- Implemented employee profile management functionality for creating, editing, searching, and viewing employee service information, including promotions and transfers.
- Developed an Excel/CSV bulk data import feature using Python and Pandas to efficiently upload and sanitize large employee datasets.
- Implemented automated notifications for upcoming compulsory retirement dates, salary increment dates, and employee birthdays.
- Developed multi-criteria search and filtering functionality to help administrators quickly locate employee records.
- Implemented print-friendly employee summary reports to support administrative and physical documentation requirements.
- Worked with MySQL to manage and retrieve employee information through the web application.

Technologies: Python, Flask, MySQL, Pandas, HTML, CSS, JavaScript

PROJECTS

STUDENT LEARNING MANAGEMENT SYSTEM

- Developed a web application that identifies students' weak subjects and allows them to request tutorials through assignments to address and improve in those subjects.

Technologies: PHP, CSS, JavaScript, HTML

Cineplex Movie Theater Website

- Developed a database-driven web system with movie listings, showtimes, seat availability, search functionality, online ticket booking, user registration, and role-based access for admins and customers to improve theater operations and user experience.

Technologies: PHP, HTML, CSS, Bootstrap, JavaScript

Smart Meal Planner Based on Body Condition & Budget (Final Year Project)

- Developed a web-based application to generate personalized meal plans based on BMI, medical conditions, and budget as input parameters.
- Integrated AI-based meal recommendation algorithms and created user dashboards for nutrition and budget tracking.

Technologies: Python, HTML, CSS, JavaScript

TECHNICAL SKILLS

- **Languages & Web Technologies:**
HTML, JavaScript, CSS, PHP, Python
- **Frameworks & Libraries:**
React, NodeJS, ExpressJS, Bootstrap
- **Databases:**
MySQL, MongoDB
- **Tools & Platforms:**
MySQL Workbench, Git, VS Code

ADDITIONAL INFORMATION

- **Career Interests:**
Software Engineering, Full-Stack Development, Web Application Development, Backend Development, Database-Driven Applications
- **GitHub:** github.com/gayanirajaksha
- **LinkedIn:** linkedin.com/in/gayanirajaksha
